

▸ Spearheaded data collection programmes in the Maldives and Indonesia to support robust science-based fisheries management, recognising sustainable small-scale fisheries

▸ Raised the international profile of environmentally sustainable and socially responsible one-by-one fisheries. Central to our work is ensuring alignment with the Sustainable Development Goals (SDGs), providing an opportunity for responsible seafood producers and businesses to actively support environmentally sustainable and socially responsible fisheries.

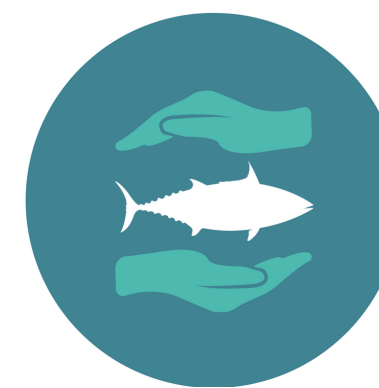

▸ Supported a dozen fisheries in their achievement and ongoing routes to improvement for social (FairTrade USA) and environmental (Marine Stewardship Council) certifications

▸ Successfully advocated for stricter regulation of harmful tuna fishing methods and improved tropical tuna management in the Indian, Western Pacific, and Atlantic Ocean.

▸ Built coalitions of coastal states to effectively protect coastal fisheries' rights.

▸ Launched new tools and incentives developed through our 2020 – 2025 Strategic Plan to accelerate ecological sustainability, inclusive economic development and long-term political and social stability.

▸ Developed capacity of African, Maldives and Indonesian decision-makers and small-scale fishery representatives to improve inclusive ocean governance.
